

All-in-One Tablet

The All-in-One Rugged Tablet PC is designed to provide high-performance computing power to users in harsh environments. Using the latest generation Intel processors, this tablet PC has enough power to host complex applications without degraded usability. The high resolution 7" display is ideal for mapping applications. It features a glass resistive touch screen that can be used with a gloved hand. The unit is rated to IP67 and uses mil-rugged connectors for connecting to Power, VGA, USB and Ethernet.
